PROFILE

I am motivated by understanding why security weaknesses occur and how to address them while keeping operations running. During my internship, I want to develop my skills in security monitoring, identity and access management, and secure IT operations. I bring a methodical approach, curiosity and experience taking responsibility as a production team leader. I enjoy troubleshooting with others, documenting solutions and checking that they work.

EDUCATION

IT & Cybersecurity Technician | Chas Academy
Higher Vocational Education (YH), Sweden | September 2025 - July 2027, ongoing
Practical studies in network and information security, Linux, system administration, cloud security, DevSecOps, risk analysis and incident handling. The internship (LIA) is part of the programme.

SELECTED PROJECTS & LABS

Secure Cloud Authentication & IAM | Team project, GCP and Terraform
Helped replace long-lived service account keys with Workload Identity Federation in GitHub Actions. Troubleshot IAM permissions and verified successful deployment after key deletion. Also reviewed access to the Terraform state bucket.
GitHub: my work on WIF, IAM and verification

Container Security | Individual lab, Docker, Trivy and Gatekeeper
Hardened a Flask container by updating the base image and dependencies, running as non-root and adding a health check. Generated an SBOM and tested policy controls. Documented scans from March 2026 showed HIGH/CRITICAL findings falling from 1,480 to 4; remaining findings were reported.
GitHub: code, scan results and documentation

Security Monitoring | Individual lab, Wazuh and network analysis
Worked with Wazuh Manager, Indexer and Dashboard alongside Docker, Python, tcpdump and Wireshark. Documented the environment and troubleshooting to connect collected logs and network traffic with security analysis.
GitHub: public reflection on SIEM and OT labs

TECHNICAL SKILLS - PRACTICAL COURSEWORK & LAB EXPERIENCE

Security: Wazuh, Suricata, Trivy, Gatekeeper, SBOM, IAM/WIF, risk analysis
Systems & networking: Linux, Bash, Windows, TCP/IP, DNS, SSH, WireGuard, UFW, tcpdump, Wireshark
Cloud & delivery: GCP/GKE, Terraform, Docker/Compose, Kubernetes, Git/GitHub, GitHub Actions, Cosign

WORK EXPERIENCE

KLS Ugglarps AB | Machine Operator & Production Team Leader
2015 - 2026 | Over three years in team leadership, responsible for 16 people
Planned and coordinated daily operations in line with safety procedures, risk assessments and quality requirements. Worked on quality assurance and process improvement. Developed the ability to prioritise, communicate clearly and follow procedures in a regulated operating environment.

PREVIOUS EDUCATION

Upper Secondary Technology Programme - Computing/IT | 2007 - 2011
